Cristopher Soto

Software Developer

Portfolio: criscodes.dev
GitHub: [criscode97](https://github.com/criscode97)
LinkedIn: [cristopher-soto-870106224](https://www.linkedin.com/in/cristopher-soto-870106224)

SKILLS

Programming Languages	Python, SQL, C++, C, JavaScript.
Frameworks	Flask, Django, Django REST, React, Dash.
OS	Linux (Ubuntu), Windows.
ORMS/DBMS	SQLite3, PostgreSQL, SQLAlchemy.
Data Visualization	Plotly.
Communication	English, Spanish (Native speaker), French (Basic)
Other	Algorithm Design and Analysis, Data Structures, AWS, PGAdmin, BigQuery, Git/Github, HTML/CSS, Bootstrap, Sass, Tkinter, unittest, Pandas.

PROJECTS

Server-Side CRUD To-Do Application

- Developed a full-stack server-side application that allows users to register and login by email and username using the Flask framework.
- Utilized the Google Calendar API with OAuth 2.0 to allow users to automatically synchronize their to-do items with their google calendar account if a deadline for the to-do item is provided.
- Designed a database using SQLAlchemy with Python OOP.
- Implemented a python SMTP using the JSON Serializer. library so that users may recover their account if they have forgotten their password.
- Built the front-end UI using Bootstrap, HTML, CSS, and Javascript.
- Implemented the Moment.js library to parse through the python datetime objects of each to do and return a user friendly datetime in the server-side UI.
- Implemented a filtering option for users' todo items.
- Deployed the application on the Linode Cloud Service using Unicorn and NginX.

Name Querying and Data Visualizing Web Application

- Developed a data-visualizing tool that allows you to query for how many people with a particular name have applied for a social security card from 1910 to present.
- Constructed a choropleth map using Plotly that tells the user how many individuals with the input name have applied for a social security card on each state for the last 100 years when they hover over each state.
- Built an interactive chart that tells the user the number of people that have applied for social security in the U.S. every year since 1910.
- Deployed application to heroku

Expense and Income Tracker API

- Developed an CRUD API using the Django Rest framework.
- Created database models using the Django framework.
- Implemented User Authentication using the Django Rest Framework JWT library.

EDUCATION AND COURSEWORK

Bachelor of Computer Science, Hunter College - CUNY (GPA 3.8)	Jun 2023
Harvard's CS50	2020 — 2021
GED, Pathways to Graduation at City College	2017 — 2018

ACTIVITIES

Vice President of The BCC Student Government Association	2020 — 2021
Bronx Community College, Inter-Organisational Council Chair	2020 — 2021
College Senate, Bronx Community College, Senator	2020 — 2021

WORK EXPERIENCE

Bartender <i>Mess Hall</i>	Jun 2019 — Oct 2020 <i>New York, NY</i>
Bartender <i>Tannat Wine and Cheese</i>	Jun 2019 — Feb 2020 <i>New York, NY</i>
Bartender, Waiter <i>Candle Cafe West</i>	Nov 2016 — May 2019 <i>New York, NY</i>
